

# Website Rebuild Estimate

Custom AWS-hosted website with lightweight admin editing tools

PREPARED FOR  
**DC Imprints**

PREPARED BY  
**Nickolas Patino / Kniraven LLC**

DATE  
**June 26, 2026**

ESTIMATE VALID UNTIL  
**July 26, 2026**

## DISCOUNTED FIXED PROJECT FEE

**Custom website rebuild, admin editing system, launch support, and handoff.**

The itemization below is for transparency. The fixed fee is based on the complete scope as a package.

**Local DeForest business discount:** 20% discount applied to the pre-discount project value.

# \$1,200

Pre-discount project value: \$1,500

Discount: -\$300

## Payment Terms

- **50% deposit to start work:** \$600
- **50% final payment before launch / final delivery:** \$600
- Deposit is applied to the total project fee.
- Deposit becomes non-refundable once project work begins.

## Estimated Timeline

- **Estimated build window:** 6-8 weeks
- Timeline starts after deposit, required access, and core content/assets are received.
- Timeline depends on feedback speed, asset readiness, and change requests.

## Project Objective

Replace the current GoDaddy/WordPress website with a custom website hosted on Amazon Web Services. The new site should look more professional, custom, polished, and inviting while making it easier for visitors to understand DC Imprints' services and submit lead/quote requests.

The site will present DC Imprints' services with appropriate attention to embroidery, promotional products, corporate/office apparel customers, and custom web stores as a service offering. The site will also emphasize local customer service, fast turnaround, and the Dane County / DeForest service area.

**Structure direction:** The site will be primarily a single-page / landing-page style experience, with service-specific pages added only where they are useful for SEO or clarity.

## Itemized Estimate

| Project Area                                      | Included Work                                                                                                                                                                                                                         | Estimate       |
|---------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Project setup and planning</b>                 | Scope confirmation, content/asset planning, access checklist, technical launch planning, and project organization.                                                                                                                    | \$100          |
| <b>Visual design direction</b>                    | Custom design direction based on DC Imprints' logo, reference sites, and requested visual style: clean, polished, inviting, high-quality images, layered text/image treatment, motion/energy where practical, and background options. | \$175          |
| <b>Custom public website development</b>          | Responsive custom front-end build with landing-page style layout, calls to action, reviews, map/location area, catalog/brand partner presentation, and SEO-supporting service pages where useful.                                     | \$300          |
| <b>Lightweight admin editing system</b>           | Single admin login with editing tools for website text, images, services, catalog/brand partner links, announcements, specials, seasonal banners, and limited theme/color/template controls.                                          | \$400          |
| <b>Lead form and email delivery</b>               | Contact/lead form with service inquiry fields, design/logo help option, optional artwork upload attached to email, and delivery to the approved DC Imprints inbox.                                                                    | \$175          |
| <b>AWS, domain, analytics, and launch setup</b>   | AWS hosting setup support, GoDaddy DNS launch coordination, SSL/HTTPS, Microsoft 365 email DNS preservation, Google Analytics/Search Console setup or reconnection, and launch verification.                                          | \$225          |
| <b>SEO, accessibility, and performance basics</b> | Local SEO structure, titles/descriptions, headings, internal links, image alt text, sitemap support, responsive layout, accessibility-conscious markup, and performance-conscious code.                                               | \$100          |
| <b>Handoff and documentation</b>                  | Admin login handoff, basic usage notes, final verification checklist, and post-launch orientation.                                                                                                                                    | \$25           |
| <b>Subtotal Before Discount</b>                   |                                                                                                                                                                                                                                       | <b>\$1,500</b> |
| <b>Local DeForest Business Discount (20%)</b>     |                                                                                                                                                                                                                                       | <b>-\$300</b>  |
| <b>Total Fixed Project Estimate</b>               |                                                                                                                                                                                                                                       | <b>\$1,200</b> |

**Pricing note:** The line items explain the estimate. The project is priced as one fixed package for the listed scope. Removing or changing individual pieces may require re-estimating the overall project.

## Included Public Website Scope

- Primarily single-page / landing-page style design
- Service-specific pages only where useful for SEO or clarity
- Embroidery, promotional products, corporate/office apparel customer messaging, and custom web stores as a service offering
- Design/logo help messaging
- About section on the homepage
- Google review quote/testimonial section
- Map/location section
- Clear calls to action throughout the site
- Catalog/brand partner link area/dropdown
- Mobile responsive layout
- Free/open-source font selection
- Basic SEO and accessibility-aware structure

# Design, Brand, and Admin Requirements

## Visual Direction

- Clean, put together, inviting, and professional.
- Respect the black and white logo while allowing accent colors or warmer background treatments if needed.
- Use the Sasquatch logo/mark as a subtle visual element where appropriate, such as a watermark or texture.
- Use a free font with a bold collegiate/block feel similar to the logo where practical.
- Exact logo font match is not guaranteed unless the original font file is available and legally usable.

## Reference Site Direction

- **Apple:** crisp, clear, premium, high-resolution product-style visuals.
- **Custom Grains:** high-quality images that pop, strong background options, and layered text/image composition.
- **Army.mil:** motion/energy where practical, bold imagery, and impactful wording.

# Admin / Editing Scope

The site will include one admin login with practical editing controls for regular website updates. This is a lightweight custom admin system, not a full drag-and-drop page builder.

| Admin Area                | Included Control                                                                                                |
|---------------------------|-----------------------------------------------------------------------------------------------------------------|
| Text                      | Edit main website text/content areas.                                                                           |
| Images                    | Update/replace website images used in editable sections.                                                        |
| Services                  | Add, remove, or edit currently offered services.                                                                |
| Catalogs / brand partners | Add, remove, or edit catalog and brand partner links, including navigation/dropdown items as needed.            |
| Announcements / specials  | Manage announcements, specials, seasonal banners, or temporary promotional messages.                            |
| Limited design controls   | Limited theme color, layout/template, and seasonal style controls. Major redesigns are outside the admin scope. |

New custom layouts, complex page-builder behavior, or major design changes are handled as additional work.

## Technical Delivery and Access Needs

The current website will remain live during development. The new site will be built in a private development environment and launched after approval.

| Area                                     | Needed Access / Information                                                                                                                                                                                       | Purpose                                                                              |
|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| <b>GoDaddy domain / DNS</b>              | Delegated access, temporary access, or screen-share with the account owner. Ability to view/export current DNS records and update A, CNAME, TXT, and possibly nameserver records.                                 | Connect the domain to the new AWS-hosted site.                                       |
| <b>Microsoft 365 email DNS</b>           | Current MX, SPF/TXT, DKIM, DMARC, Autodiscover, and related email records must be preserved. No Microsoft 365 password should be needed for normal website launch work.                                           | Protect existing business email while the website changes.                           |
| <b>AWS account</b>                       | AWS account owned by DC Imprints, billing set up by DC Imprints, and appropriate temporary/delegated setup access. Root credentials remain with DC Imprints.                                                      | Host the new custom website and related services.                                    |
| <b>Google Analytics / Search Console</b> | Existing GA4 Measurement ID or Analytics access if available. If current reporting is GoDaddy-only and cannot be carried over, a new GA4 property may be set up. Search Console may require DNS TXT verification. | Measure traffic/activity and monitor Google Search presence.                         |
| <b>Form email delivery</b>               | Approved recipient email and approved sender address. Final sending method may use Microsoft 365 SMTP if available or a verified AWS SES domain/sender. DNS TXT/CNAME verification may be required.               | Allow form submissions and attached artwork to reach the approved DC Imprints inbox. |
| <b>Current WordPress site</b>            | Optional access if needed for copying existing content, images, redirects, or analytics details.                                                                                                                  | Preserve useful current-site material.                                               |

## Process and Revisions

| Step | Process                                                                             |
|------|-------------------------------------------------------------------------------------|
| 1    | Estimate approval, 50% deposit, required access, and core asset/content collection. |
| 2    | Design direction and structure review.                                              |
| 3    | Public website build in private development/staging environment.                    |
| 4    | Admin tools, lead form, analytics, SEO, and launch setup.                           |
| 5    | Review, two reasonable revision rounds, and one final pre-launch polish pass.       |
| 6    | Final payment, launch, admin handoff, and final verification.                       |

**Additional revisions:** New features, major design changes, or extra revision rounds require written approval and may be billed at **\$35/hour** or quoted separately.

## Exclusions, Terms, and Acceptance

### Not Included Unless Separately Approved

- Online checkout or payment collection
- Customer accounts or order tracking
- Building actual customer web stores
- Supplier API/product database integration
- Full drag-and-drop page builder
- Multiple admin roles/users
- Logo redesign or full brand identity package
- Professional photography or paid stock assets
- Paid font licensing
- Ongoing maintenance after launch
- Guaranteed search ranking or lead volume
- Legal/privacy-policy drafting beyond placement of approved text

### Key Terms

- **Scope:** This estimate covers only the listed deliverables. New features or major changes may change price and timeline.
- **Payment:** Work begins after the 50% deposit. Final payment is due before public launch, final handoff, or transfer of production access.
- **Discount:** The Local DeForest Business Discount applies to this estimate only and does not change the listed scope or terms.
- **Third-party costs:** AWS, GoDaddy/domain fees, Microsoft 365, paid assets, paid fonts, and other third-party costs are not included unless specifically approved.
- **Client materials:** DC Imprints is responsible for rights to use provided logos, images, reviews, copy, customer names/logos, files, fonts, or other materials.
- **Final approval:** DC Imprints is responsible for approving business information, service descriptions, claims, review quotes, contact info, and legal/privacy content.

- **SEO:** SEO best practices are included, but specific Google rankings, traffic, or lead volume cannot be guaranteed.
- **Third-party services:** Reasonable care will be used with GoDaddy, AWS, Google, and Microsoft 365. Third-party outages, account issues, DNS delays, provider changes, and service limits are outside Kniraven LLC's control.
- **Email and analytics dependencies:** Email delivery and analytics reconnection depend on account access, DNS verification, approved sender/recipient addresses, and provider settings. If existing GoDaddy-only analytics cannot be transferred, a new GA4 setup may be used.
- **Security:** Reasonable security practices will be used, but no website or form upload system can be guaranteed immune from all vulnerabilities, spam, abuse, or attacks.
- **Ownership:** After full payment, DC Imprints receives rights to the final website deliverables created specifically for this project. Kniraven LLC retains rights to pre-existing tools, reusable code, general methods, workflows, and know-how.
- **Bug-fix window:** Includes 30 days after launch for defects in the delivered scope. New features, design changes, content updates, third-party changes, or later modifications are not included.
- **Estimate acceptance:** This estimate may serve as the project agreement once accepted in writing and deposit is paid, unless replaced by a separate written contract.

### Acceptance

By accepting this estimate, DC Imprints authorizes Kniraven LLC to begin work on the listed project scope under the terms above.
